Like humans, cities are mortal. They are born, they thrive, and they eventually die. In Atlas of Lost Cities, Aude de Tocqueville tells the compelling narrative of the rise and fall of such notable places as Pompeii, Teotihuacn, and Angkor. She also details the less well known places, including Centralia, an abandoned Pennsylvania town consumed by unquenchable underground fire; Nova Citas de Kilamba in Angola, where housing, schools, and stores were built for 500,000 people who never came; and Epecuen, a tourist town in Argentina that was swallowed up by water. Beautiful, original artwork shows the location of the lost cities and depicts how they looked when they thrived.

The book discusses the concept of the smart city, and is based on a multi-service and multi-sectoral approach to urban planning, including various urban functions and the human capital of cities. The work is divided into three parts. The first is an introductory section which covers definitions, policies and tools used at European level for the development and classification of a smart city. The second presents a selection of examples of Western and Eastern communities, which experienced technologies and strategies that have made them smart. The third describes in detail the main three possible approaches (economical,

technological and social) to the smart city concept which are the focus ambits of the holistic concept of smart city. The work provides a good overview of the concept of smart city, and also offers a critical analysis of the various approaches to smart cities, in order to provide tools to develop solutions that address the smart development of cities with an approach as multi-sectoral as possible. Its accessible language and several examples make the book easy to read and appealing to public administrators, students, planners and researchers.

"Nonstop Metropolis, the culminating volume in a trilogy of atlases, conveys innumerable unbound experiences of New York City through twenty-six imaginative maps and informative essays. Bringing together the insights of dozens of experts-from linguists to music historians, ethnographers, urbanists, and environmental journalists-amplified by cartographers, artists, and photographers, it explores all five boroughs of New York City and parts of nearby New Jersey. We are invited to travel through Manhattan's playgrounds, from polyglot Queens to many-faceted Brooklyn, and from the resilient Bronx to the mystical kung fu hip-hop mecca of Staten Island. The contributors to this exquisitely designed and gorgeously illustrated volume celebrate New York City's unique vitality, its incubation of the avant-garde, and its literary history, but they also critique its racial and economic inequality, environmental impact, and erasure of its past. Nonstop Metropolis allows us to excavate New York's buried layers, to scrutinize its political heft, and to discover the unexpected in one of the most iconic cities in the world. It is both a challenge and homage to how New Yorkers think of their city, and how the world sees this capital of capitalism, culture, immigration, and more." -- Publisher's description.
