Brater, Enoch (1987), Beyond Minimalism: Beckett's Late Style in the Theatre (Oxford: Oxford University Press). Google Scholar Brater, Enoch(1994), The Drama in the Text: Beckett's Late Fiction (New York: Oxford University Press).

Beginning Science: Biology is for use during the first three years of secondary education. It provides a foundation for GCSE and includes topics of social significance to give a more balanced view of the subject.

An established and successful textbook which provides a thorough and comprehensive basis for GCSE syllabuses. The social, environmental, and technological aspects of biology are discussed throughout the book and students are encouraged to explore topics in depth through investigational and experimental work. Simply worded text with clear explanations of important technical terms. Superb structural drawings and easy-to-copy diagrams which show students how to reduce complex information to a simple form. Questions at the end of each chapter designed to reinforce understanding.

Aiming to cover the main topics required by GCSE syllabuses in Human Biology, this textbook is also useful as a supplement for GCSE Biology courses. It provides a basic reference for students needing a grounding in Human Biology. It features clear explanations of important technical terms, a glossary, and vocabulary and comprehension tests.

Provides information in manageable chunks, which is reinforced by questions and activities that encourage students to consider the practical application of science to everyday life. This work is useful for Higher Tier GCSE students.

Fully revised and updated for the seventh edition, this market-leading dictionary is the perfect guide for anyone studying biology, either at school or university. With more than 5,500 clear and concise entries, it provides comprehensive coverage of biology, biophysics, and biochemistry. Over 250 new entries include terms such as Broca's area, comparative genomic hybridization, mirror neuron, and Pandoravirus. Appendices include classifications of the animal and plant kingdoms, the geological time scale, major mass extinctions of species, model organisms and their genomes, Nobel prizewinners, and a new appendix on evolution. Entry-level web links to online resources can be accessed via a companion website.

Aimed at both students and new researchers, the fourth edition of this text provides a concise yet comprehensive overview of cancer biology, covering the current status of both research and treatment.

Covers the biology content of the science National Curriculum for students studying for GCSE examinations
