There is no hard and fast rule about the number of forces that must be drawn in a free-body diagram. The only rule for drawing free-body diagrams is to depict all the forces that exist for that object in the given situation. Thus, to construct free-body

This can be written in the formula: $a^2 + b^2 = c^2$. This is where c is the longest side. In the example above, $a = 4$ m/s and $b = 3$ m/s. $c^2 = 4^2 + 3^2$.
